Position

- Director, CES; Professor, Geosciences

Research Interests

- Human Dimensions of Global Environmental Change
  - How to adapt land use to the effects of changing climate?
    (Bos, Mia, Phx, Bal, LA, MSP)
  - How to produce institutions to advance Sustainability Science?

- Why Florida...

  - This is where the action is. Period.
How will biophysical marsh responses to sea-level rise interact with human adaptation responses to potential marsh losses?
- Case studies in S. Florida, Georgia, Virginia, Massachusetts

How can suburban water management adapt to suit future climate and land use patterns?
- Case studies in S. Florida, Massachusetts

How can a university research Center implement best practices of “Sustainability Science”?
- Case studies in S. Florida & Phoenix
