The Florida Grazing Lands Coalition (FGLC) is hosting a grazing workshop to address problems facing producers and conservationists concerned with effective land management. The topics featured will give you information you can take home and put to use as well as possible funding to accomplish them. Researchers working on demonstration projects funded by the Florida Grazing Lands Coalition will also be presenting the beneficial information they have collected. Poster presentations will be available to view from past research projects. Come join us for an informative session on grazing management in Florida. Fees will cover lunch and materials presented at the conference.

Highlights

- Invasive Species Control
