

# Nathan Dorn (“Nate”)

- **Position**

- ▣ Associate Professor, Biological Sciences, FAU

- **Research Interests**

- ▣ Freshwater Ecosystems
- ▣ Animal Population Limitation
- ▣ Trophic Interactions
- ▣ Determinants of community structure

# Dorn Research Projects

- **Population limitation of wetland crayfishes**

- hydrological drought
- predation

- **Prey use of nesting wading birds**

with M. Cook (SFWMD), D. Gawlik & former student collaborators.

- **Population limitation, juvenile identification and distributions of apple snails.** with J. Baldwin

- **Amphibian community structure in wetlands.**

with former student J.D. Holbrook
