

Colin Hughes

- Position
 - ▣ **Associate Professor, Biological Sciences, FAU**
- Research Interests
 - ▣ Evolutionary genetics, and its relationship to conservation.
 - ▣ Role of disease in wild population demography
 - ▣ Origin and Impact of invasive species
- When not at work
 - ▣ Squash, gardening, and bird watching

Hughes research projects

- MHC genes as indicators of the role of disease

- ▣ **Green-rumped parrotlet**

- ▣ **Bald eagle**

- ▣ **Common Snook**

- Genetic population structure and

- history of invasion.

- ▣ **Brazilian Pepper**

- Assessing the impact of invasives.

- ▣ **Argentine black and white tegu**
