

The Center for Climate Strategies

Helping States and the Nation Tackle Climate Change

State Climate Action Planning: Florida Energy Commission

Center For Climate Strategies

May 9, 2007

Center for Climate Strategies

- Nonprofit 501c3 policy development group with 25 experts located across the US
- Impartial and expert
- Partner with states to develop climate action policies and plans
- Multiple areas of technical and policy expertise including: climate, energy, transportation, natural resources, economic development
- Supported by states and a consortium of private foundations
- Tom Peterson, Executive Director
 - tdp1@mac.com
 - www.climatestrategies.us

US States: 30 of Top 75 World Emitters

State GHG Growth Rates

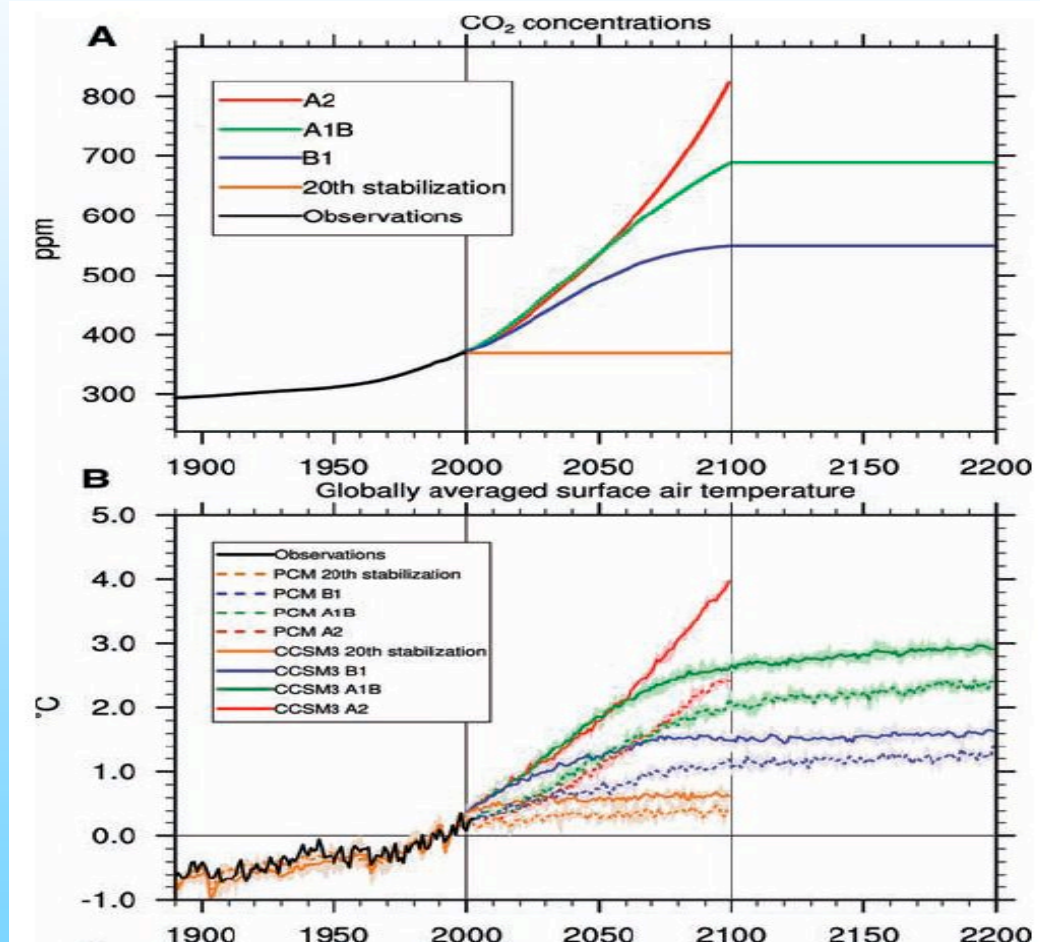

Reasons for Action

- Coincidence
- Co-benefits
- Avoided damages
- Shape policy
- Form markets
- Political leadership

Stabilization Scenarios

Carbon Dioxide
Concentration

Warming (°C)

Progress Through Action!

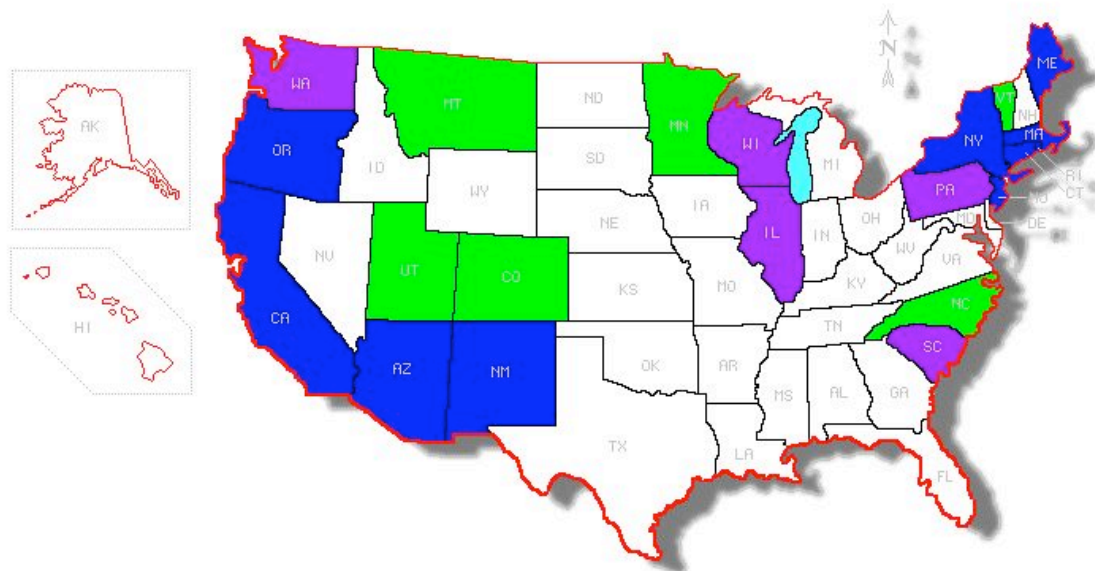

North Carolina GHG Inventory & Forecast

Comprehensive State Climate Action Plans

State Climate Change Actions Since 2000: Center for Climate Strategies

- - Completed Plans
- - Plans Underway
- - Plans Just Announced

2-8-07

States Provide Diverse Solutions

- Over 300 actions identified by states that reduce GHG emissions (CCS Catalog of States Actions)
 - Energy efficiency and conservation
 - Clean and renewable energy
 - Transportation and land use efficiency
 - Forest and agriculture conservation
 - Waste management
 - Industrial process improvement

Implementation Methods: One Size Doesn't Fit All

- Voluntary Agreements
- Technical Assistance
- Financial Incentives
- Targeted Spending
- Codes and Standards
- Market Based Approaches
- Pilots and Demos
- Information and Education
- Research and Development
- Reporting and Disclosure

State Climate Goals

State	1990-2020 GHG Forecast	State Goals	Climate Plan Coverage
Arizona	149%	2000 levels by 2020; 50% below by 2040	106%
California	41%	- E.O.: 2000 level by 2010; 10% below by 2020; 80% by 2050 - AB-32: 1990 levels by 2020	100%
Connecticut	32%	1990 level by 2010; 10% below by 2020; 75% by 2050	100%
Maine	34%	1990 level by 2010; 10% below by 2020; 75% by 2050	100%
New Jersey	TBD	1900 levels by 2020; 80% below 2006 levels by 2050	TBD
New Mexico	48-64%	2000 level by 2012; 10% below by 2020; 75% by 2050	137%
Oregon	38%	1990 level by 2010; 10% below by 2020; 75% by 2100	85%
Puget Sound	37%	1990 level by 2010; 10% below by 2020; 75% by 2100	100%
Rhode Island	35%	1990 level by 2010; 10% below by 2020; 75% by 2050	100%
Vermont	TBD	25% below 1990 levels by 2012; 50% below 1990 by 2028; 75% by 2050	TBD
Washington	31%	1990 levels by 2020; 25% below by 2035; 50% below by 2050	TBD

International GHG Targets

Arizona Climate Plan Results

GHG Reduction Strategies

CCAG Recommended Policy Options, by Quantified Cost Per Ton GHG Removed
Cost savings are shown below the axis. Net costs are shown above the axis.

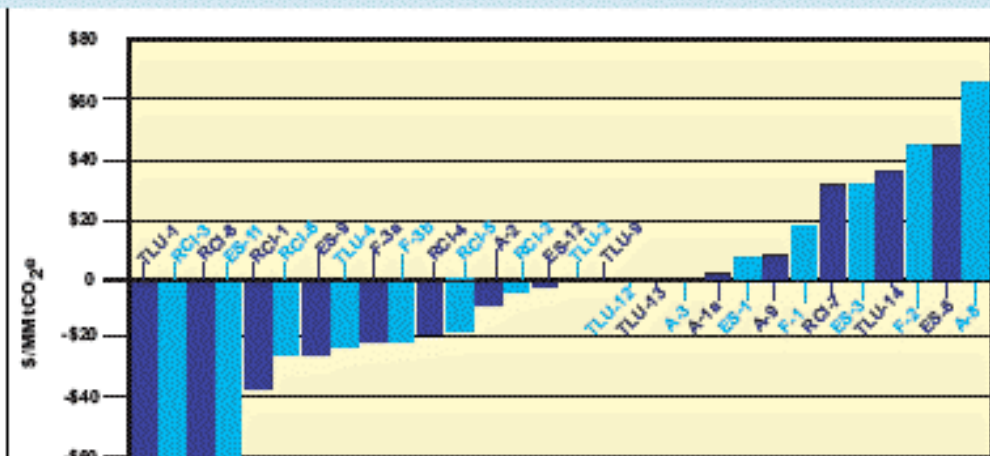

Table 1-3 Totals

Total of all CCAG Options with Adjustments for Overlap (Detailed data may be found in the Tables presented in Chapters 4-8 and the Appendix)	2010 Annual GHG Reduction (MMtCO ₂ e)	2020 Annual GHG Reduction (MMtCO ₂ e)	2007-2020 Cumulative Reduction (MMtCO ₂ e)
	15.4	69.4	485.4 ^a

**+285,000
jobs**

The Center for Climate Strategies (CCS) has calculated overall net economic cost savings from the CCAG's policy option recommendations of more than \$5.5 billion from 2007-2020. The CCS also has calculated that the average cost for each ton of GHGs removed would be -\$12.74, meaning that there would be a net economic cost savings of \$12.74 for each ton of GHGs removed.¹⁵

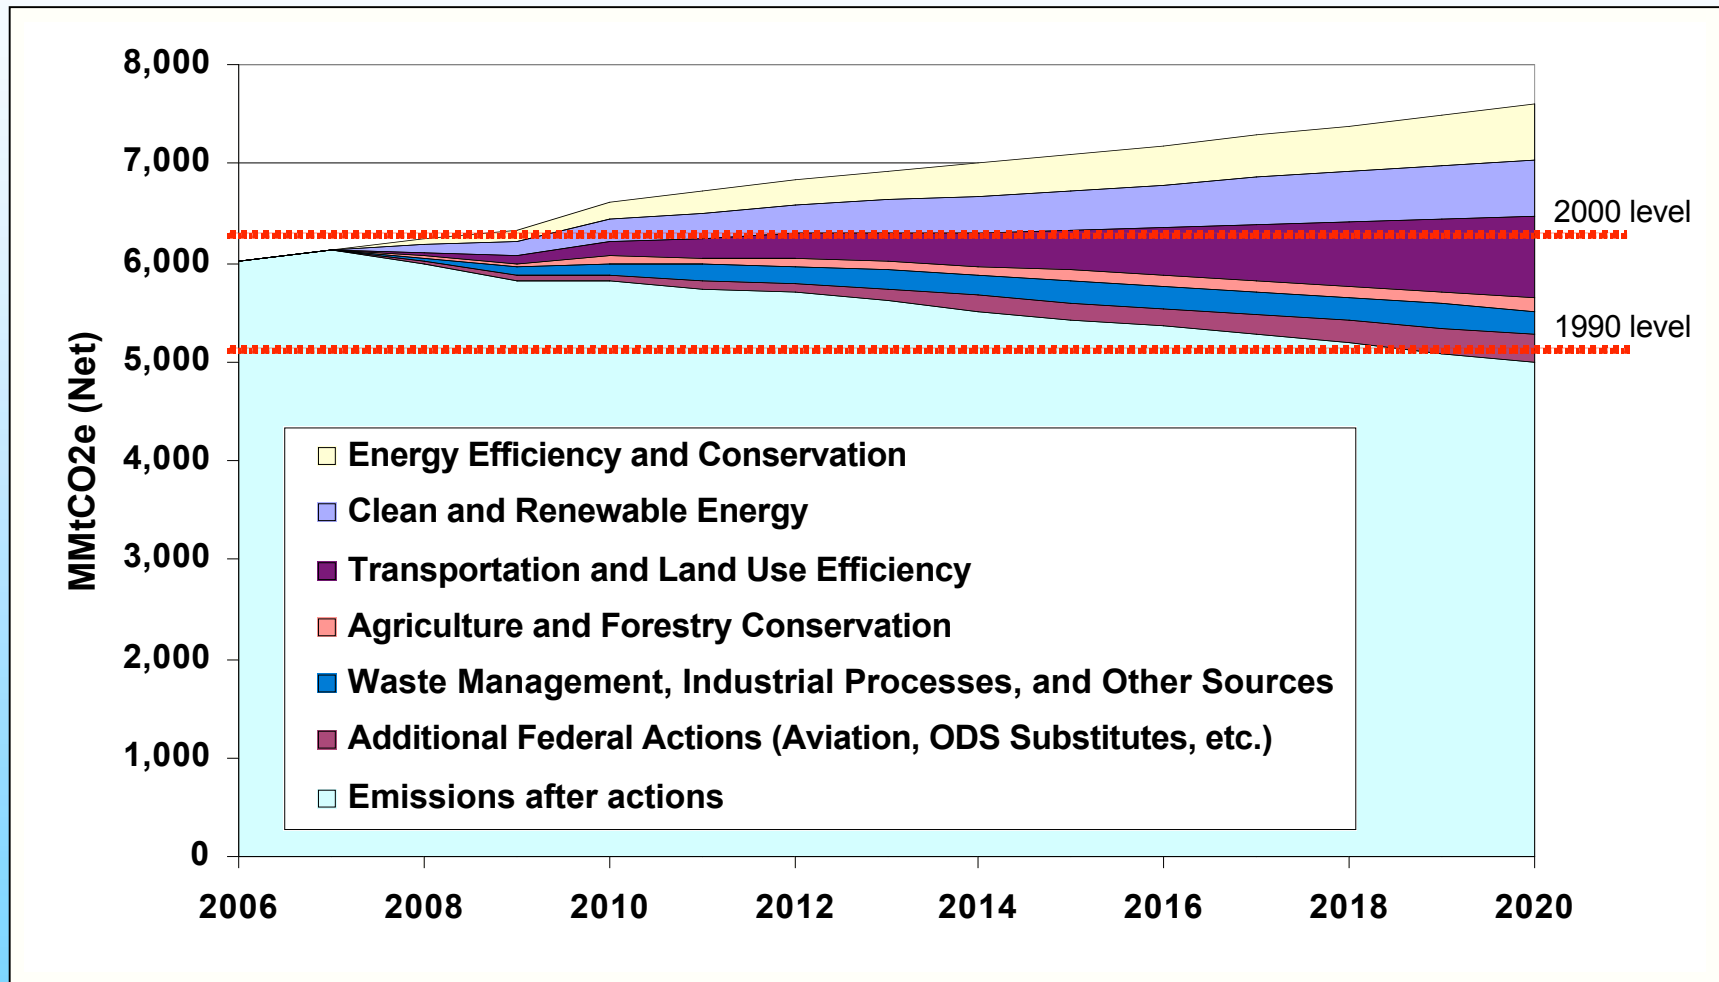

National Emissions Trajectory

Based on estimated reductions below BAU from planned/implemented actions in leadership states

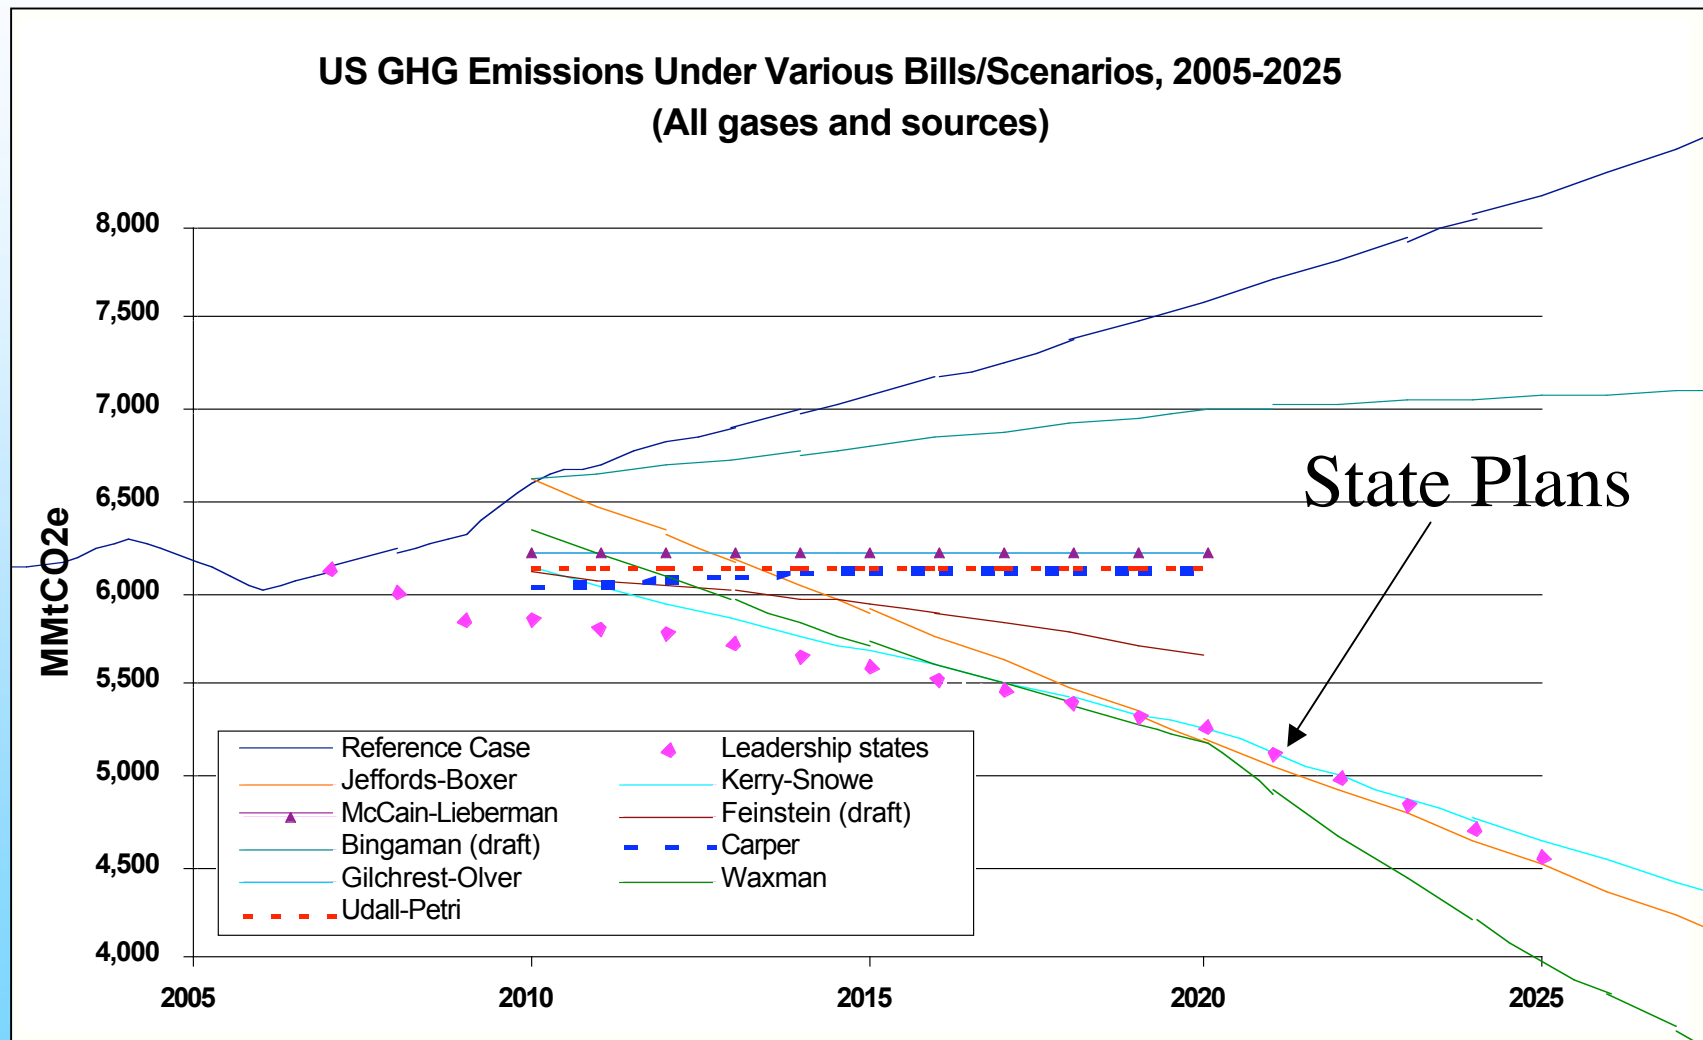

How Leadership States Are Doing It

(States' "wedges" scaled to national GHG emissions)

A Closer Look... (2005-2025 only)

Why Are State Plans Working So Well?

- Self determined and open ended
- Comprehensive on all dimensions
- Highly participatory and collaborative
- Allow extended discussion
- Well organized
- Use stepwise process
- Advanced fact finding and analysis
- Joint policy development
- Transparent and open
- Inclusive and diverse

Stepwise Planning Process

1. Develop inventory and forecast of emissions
2. Identify a full range of possible actions
3. Identify initial priorities for analysis
4. Develop straw proposals
5. Quantify GHG reductions and costs/savings
6. Evaluate co-benefits, feasibility issues
7. Develop alternatives to address barriers
8. Aggregate results
9. Establish goals or targets
10. Implement recommendations
