

Presented by FAU's Center for Environmental Studies & the 2013 Sea Level Rise Summit

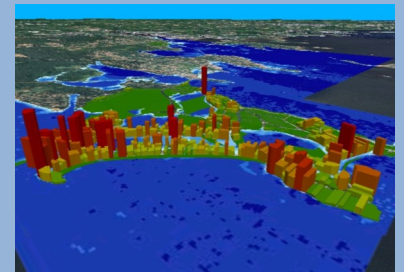

Sea Level Rise & Storm Surge Adaptation Clinic October 18th

Session One: 9:30 – 11:30am Climate Central

Join **Climate Central** for a free hands-on demonstration of their **2nd generation Surging Seas 2.0** web tools using NJ and NY as case studies. Learn how the software works before it is released for the State of Florida at the SE FL Regional Climate Leadership Summit November 7 – 8! The soon-to-be released web tools are designed to provide local regions & policy makers with customized information needed to understand and respond to the risks of sea level rise and coastal flooding. During the first hour, Climate Central will provide participants with a tour of the software using actual data from those states that have been released to date. The second hour will be reserved for Q&A and discussion. **RSVPs Required**

RSVPs Required

Session Two: 11:30am – 5:15pm COAST

Following the use of Surging Seas v2.0, communities will want to take adaptation action but may be unsure which actions are good investments. Join Catalysis Adaptation Partners' **Sam Merrill & JT Lockman** for an interactive "fishbowl" clinic to learn the **COAST** approach (Coastal Adaptation to Sea level rise Tool). See first-hand how it can be tailored for use in community engagement & cost benefit analysis of adaptations for municipalities & organizations in planning for sea level rise & storm surge. Pre-selected participants from 12 coastal communities will learn how to use this approach for vulnerable assets in their jurisdiction (e.g., real estate, economic activity, infrastructure) & adaptation actions they are considering (i.e., fortify, accommodate, or relocate). Attendees may observe all 12 clinic sessions & participate in the discussions based on their own experience & concerns. **RSVPs Required**

Join Us for This Unique (& Free) Opportunity!

The combination of the exceptional tools & information available by both organizations will make this Clinic the perfect reason to add one more day to your October Sea Level Rise Summit Week! You may attend all or part of the day & an agenda with details on the case studies will be available on our website as soon as they are confirmed.

Catered boxed lunches will be available for purchase (\$10 cash or credit cards)

Location: The Velocity Center
of the First Baptist Church
301 E. Broward Blvd. Fort
Lauderdale, FL 33301
